

Construction Method: Pipe Bursting

Project: Picnic Point Sewer Rehabilitation, Alderwood Water and Wastewater District

Location: Snohomish County, Washington

Date: 2013-2014

Job Scope:

- ❖ Feasibility Analysis
- ❖ Cost Estimates/Schedules
- ❖ Bid Document Preparation
- ❖ Construction Management

Project Description:

Staheli Trenchless Consultants provided the design and specialized construction management of the replacement of 3,500 linear feet of gravity sewer by pipe bursting and 345 linear feet of gravity sewer by open trenching. STC performed an analysis identifying feasible construction alternatives for the sewer replacement, and upon the selection of the preferred alternative by the District, provided a design package including cost estimates, schedules, and a full set of specifications and Contact Drawings. STC also performed on-site specialized construction management during the construction of the project.
